

serial	paper title
1	A machine learning framework for TCP round-trip time estimation
2	A Distance Routing Effect Algorithm for Mobility (DREAM)
3	
4	Securing ad hoc routing protocols
5	A Trust and Energy Aware Routing Protocol for Wireless Sensor Network
6	An adaptive RIO (A-RIO) queue management algorithm.
7	kROp: k-Means clustering based routing protocol for opportunistic networks
8	TIMELY: RTT-based Congestion Control for Datacenter
9	Throughput and Congestion Analysis with Improved Routing Algorithm
10	A Novel Scheduling and Queue Management Scheme for Multi-band Mobile Routers
11	A Reverse AODV Routing Protocol in Ad Hoc Mobile Networks
12	TCP CERL: congestion control enhancement over wireless networks
13	RSFB: a Resilient Stochastic Fair Blue algorithm against spoofing DDoS attacks
14	Design, implementation and evaluation of congestion control for multipath TCP
15	BeeAdHoc: an energy efficient routing algorithm for mobile ad hoc networks inspired by bee behavior
16	RTT based wormhole detection using NS-3
17	IMPROVEMENT OF ZIGBEE ROUTING PROTOCOL
18	RR-TCP
19	GeoTORA: A Protocol for Geocasting in Mobile Ad Hoc Networks
20	Improved RTO Algorithm for TCP Retransmission Timeout
21	Modifying TCP's Congestion Control for High Speeds
22	AIMD congestion control and avoidance
23	CC-ADOV: An Effective Multiple Paths Congestion Control AODV
24	TCP Petra: Enhanced TCP Westwood Slow Start Phase
25	TCP Vegas-A: Improving the Performance of TCP Vegas
26	Randomized Energy-Based AODV Protocol For Wireless Ad-Hoc Network
27	An Effective Approach to the Retransmission Ambiguity Problem
28	TCP WITH FASTER RECOVERY
29	An Ad Hoc Network with Mobile Backbones*
30	Ant colony optimization based polymorphism-aware routing algorithm for ad hoc UAV network
31	Equation-Based Congestion Control for Unicast Applications
32	Load Balancing Routing Mesh Network Algorithm (PLB)
33	Opportunistic routing in multi-hop wireless network
34	Adaptive Bandwidth Share Estimation in TCP Westwood
35	LRED: A robust and responsive aqm algorithm
36	An Improved Active Queue Management Algorithm Based on Nonlinear Smoothing
37	Modified Fast Recovery Algorithm for Performance Enhancement of TCP-NewReno
38	short lived flow friendly RED (SHRED)
39	Modified RED algorithm to improve the performance of web traffic
40	Congestion control improvement using an improved routing protocol (R-AODV)
41	Logarithmic window increase for TCP Westwood+ for improvement in high speed, long distance networks (Logwestwood+)
42	rtt20.pdf (princeton.edu)
43	F2-TCP: A fairer and TCP-friendlier congestion control protocol for high-speed networks
44	DC-Vegas: A delay-based TCP congestion control algorithm for datacenter applications

45	TCP Westwood with agile probing
46	The Peak Hopper
47	Better Throughput Performance of IEEE 802.11 MAC Layer using Adaptive Fragmentation
48	A cluster-based routing algorithm for VANET
49	tcp-dual by wang & crowcroft
50	TCP Venoplus — A cross-layer approach to improve TCP performance in wired-cum-wireless networks using signal strength
51	TCPW BR: A Wireless Congestion Control Scheme Base on RTT
52	TCP-Fusion: A Hybrid Congestion Control Algorithm
53	TCP-AR (Adaptive Reno)
54	Stochastic RED https://ieeexplore.ieee.org/document/4289724?arnumber=4289724
55	A novel approach for congestion control in wireless network
56	RTT Linked Enhanced Congestion Control Mechanism
57	Implementation of Epidemic Routing with IP Convergence Layer in ns-3
58	Flexible Random Early Detection Algorithm for Queue Management in Routers
59	Improvement of TCP Reno Congestion Control Protocol
60	Adaptive low-priority congestion control for high bandwidth-delay product and wireless networks
61	TEEN: A Routing Protocol for Enhanced Efficiency in Wireless Sensor Networks
62	Modified TCP NewReno for Wireless Networks
63	AOLSR: hybrid ad hoc routing protocol based on a modified Dijkstra's algorithm
64	TCP-ArtaVegas with RTT Estimation using Adaptive Kalman Filtering
65	Simulation Analysis of Congestion Control in WSN Based on AQM
66	Compound TCP:A Scalable And TCP freindly Congestion Control for High Speed Networks
67	D-TCP: Dynamic TCP congestion control algorithm for next generation mobile networks
68	HRED, An Active Queue Management Algorithm for TCP Congestion Control
69	
70	CUBIC-FIT: A High Performance and TCP CUBIC Friendly Congestion Control Algorithm
71	Blue and Stochastic Fair Blue (SFB)
72	BACKGROUND TCP DATA TRANSFER WITH INLINE NETWORK MEASUREMENT
73	TCP-Peach: a new congestion control scheme for satellite IP networks
74	TCP-Africa: An Adaptive and Fair Rapid Increase Rule for Scalable TCP
75	Improving Reinforcement Learning Based Adaptive TCP Congestion Control with Bi-Level Optimization
76	Effect of AQM-Based RLC Buffer Management on the eNB Scheduling Algorithm in LTE Network
77	ASRAN algo - Adaptive TCP Transmission Adjustment for UAV Network
78	INVS:TCP congestion control algorithm for heterogeneous Internet
79	TCP-NJ+
80	BBR-CWS: Improving the Inter-Protocol Fairness of BBR
81	Improving TCP congestion control over internets with Heterogenous Transmission Media
82	TCP retransmission timeout algorithm using weighted medians
83	Delay-Aware BBR congestion control algorithm for RTT Fairness Improvement
84	An optimization routing protocol for FANETs
85	HyStart++: Modified Slow Start for TCP
86	Enhanced TCP Westwood congestion avoidance mechanism (TCP WestwoodNew)
87	Markov model based congestion control for TCP

88	D-LIA: Dynamic congestion control algorithm for MPTCP
89	FAST TCP (Improved TCP Vegas) for Congestion Control
90	RRED to Counter LDoS
91	Intrusion detection system with cryptography algorithm to obstruct Man-In-The-Middle attack in wireless network
92	Energy Efficient Multipath Routing Protocol for Mobile ad-hoc Network Using the Fitness Function
93	TCP Congestion Control Scheme Suited for Bandwidth Reservation Network
94	TCP Congestion Control Scheme for Wireless Networks based on TCP Reserved Field and SNR Ratio
95	TCP LR-Newreno congestion control for IEEE 802.15.4-based network
96	Routing Protocol based on Floyd-Warshall Algorithm Allowing Maximization of Throughput
97	SRED: stabilized RED
98	Energy Efficient Congestion Control for Multipath TCP in heterogenous Networks + TCP-COPA
99	TCP Nice: A Mechanism for Background Transfers
100	Priority based Congestion Control in Wireless Networks
101	VFAST TCP: A delay-based enhanced version of FAST TCP
102	Ant Colony Optimization based Routing algorithm for Wireless Sensor Networks
103	Active Queue Management using P-CHOKe algorithm
104	Improving Low Extra Delay Background Transport Congestion Control
105	TCP congestion control using TCP libra algorithm(Base-NewReno)
106	BLUE: Active Queue Management
107	Modified Fast-Vegas-LIA Hybrid Congestion Control Algorithm for MPTCP
108	A new TCP congestion control algorithm for media streaming
109	Improving QoS of Mobile Ad-hoc Network using Cache Update Scheme in Dynamic Source Routing Protocol
110	Using Minimum Spanning Tree in Dynamic Routing
111	Updated TCP Congestion Control Algorithm For Wired and Wireless Networks
112	AN ACTIVE QUEUE MANAGEMENT ALGORITHM FOR REDUCING PACKET LOSS RATE
113	Temporally Ordered Routing Protocol (TORA)
114	Improving performance of TCP vegas for high bandwidth-delay product networks
115	An Analysis of Alterations to the SCTP RTO Calculation Mechanism for WLAN Environments
